EDUCATION

National University of Singapore

B.Comp. in Computer Science — NUS College (Honours Programme)

Singapore

Expected May 2027

NUS Overseas Colleges (NOC), New York: Selective year-long placement embedding students full-time at US startups; coursework in product management, market-entry strategy, and business model design.

Coursework: Software Product Engineering for Digital Markets (CS3216, selective admission), User Interface Development — conversational UI & LLM agents (CS3249), Responsible AI — privacy, fairness, trustworthiness (CS3268), Software Engineering, Data Structures & Algorithms

EXPERIENCE

Intelligems

New York, USA

Series A AI-native profit optimization platform running agentic pricing, offer, and checkout experiments for Shopify brands.

Full-Stack Product Engineer

Aug 2025 – Jul 2026

- Engineered and shipped three production features end-to-end — merchant onboarding, a Shopify checkout blocks module, and an internal prediction market for forecasting experiment outcomes — across a React/TypeScript frontend and Node backend serving 500+ merchant accounts.
- Increased onboarding completion rate by 7% by instrumenting drop-off telemetry across the activation funnel, isolating the highest-friction steps, and rebuilding them.
- Automated the billing bug reporting workflow with an internal Slack bot, eliminating ~2 hours/day of manual invoicing operations for a 2-person finance team.
- Diagnosed and fixed a rendering defect in the checkout blocks module that misrepresented setup state to merchants, tracing the root cause and streamlining the block creation path.

Eduville

Singapore

EdTech startup building AI-powered gamified learning tools for mother-tongue language education, deployed in Singapore schools.

Full-Stack Engineer

May 2025 – Aug 2025

- Architected and deployed a real-time multiplayer feature on the MERN stack, implementing WebSocket synchronization to support concurrent user sessions on a live learning platform used by 12 schools.
- Owned the full lifecycle — React frontend, Node/Express API, socket infrastructure, and deployment — handling state-sync and reconnection edge cases in live classrooms.

GetGo Carsharing

Singapore

Singapore's largest carsharing operator: 3,000+ vehicles, 400,000+ users, 1,700+ locations islandwide.

Supply Strategy & Data Science Intern

May 2024 – Aug 2024

- Built a Python web scraper capturing every car-availability event across competitor BlueSG's network, generating a proprietary longitudinal dataset where no public data existed.
- Analyzed fleet utilization and market coverage patterns to identify zone-level supply gaps in BlueSG's network, informing GetGo's fleet reallocation strategy into underserved zones.

PROJECTS

HypeX — SocialFi Platform | Co-Founder & Engineer

Aug 2025 – Jan 2026

- Built and shipped a platform enabling creators to tokenize posts as digital assets, letting users buy shares in content predicted to go viral.
- Ran 20+ investor and customer discovery conversations, repositioning the product from creator ownership to speculation on virality based on what resonated.

Preflight — Pre-launch LLM Safety Audit

- Built a reproducible LLM safety evaluation harness in Python that generates adversarial test suites from policy text, runs them against a target model via API, and scores responses by severity tier.
- Validated the severity classifier against a hand-labeled golden set of [~200] cases, reporting precision/recall per tier and calibration, with a documented error analysis.
- Engineered reproducible, auditable evaluation runs (fixed-config replay, full input/output provenance) over 3 adversarial test cases across 4 attack vectors.
- Implemented a moderation-queue simulator modeling backlog, reviewer disagreement, and appeal-overturn rates.

TECHNICAL SKILLS

Languages & Frameworks: Python, TypeScript, JavaScript, SQL, React, Node.js, Express, WebSockets / [Socket.IO](#), Claude and Codex

Data & Tools: MongoDB, Git / GitHub, REST APIs, AI-assisted development (Claude Code) · English (native), Tamil (conversational)

Design & Product: Figma (wireframing, prototyping, design systems), user research & usability testing, PRD writing

LEADERSHIP & COMPETITIONS

Asian Undergraduate Symposium — Student Councillor & Mentor

Jul 2024

Co-organized a two-week symposium for 350+ delegates from across Asia; mentored two teams, one winning SGD 5,000 for a financial-literacy solution.

Trading: Harvard Undergraduate Trading Competition — Finalist, 9th/60+ teams (USD 1,000) · IMC Prosperity, Roostoo — Finalist
